Valerie Leach, LCDCII, OCPSI
Valerie.Connolly-Leach@mha.ohio.gov
Objectives

1. Where does youth-led prevention (YLP) “fit” in the health care delivery system?
2. Why implement YLP?
3. What is YLP?
4. What is the evidence that supports YLP?
5. What is the Ohio Youth-Led Prevention Network (OYLPN)?
Public Health Approach

Health and educational outcomes are influenced by the characteristics of peers.

Intervention Funnel

- None
- Mild
- Moderate
- Severe

Thresholds for Action:
- Specialized Treatment
- Brief Intervention
- Primary Prevention
- Prevention
Continuum of Care

Community-Based Process

Problem ID & Ref. and Alternatives

Environmental

Level of Change: Individual

Level of Change: Community
Shared Risk/Protective Factors

- Substance Abuse
- Depression
- Peer Rejection
Why Youth-Led Prevention?

• YLP represents a sound investment through meaningful youth involvement in community prevention efforts.
• YLP has been viewed as a substance abuse prevention program.
• YLP is a comprehensive approach to addressing the emotional and behavioral health of youth and young adults.
Youth-Led Prevention...

- is an effective way of sharing knowledge.
- is credible because it is based on real experiences.
- is a good way of communicating ideas.
- encourages a stable peer network.
- protects students from being victimized or bullied.
- encourages strong interpersonal skills
- enables students to maintain healthy relationships
What is Youth-Led Prevention?

YLP IS...

- Youth hearing directly from their peers about how to handle issues.
- Youth given a voice in planning, decision-making, implementation, evaluation, and recognition processes.
- Youth involvement in the entire prevention process.

YLP is NOT...

- Adults telling youth: “Don’t use drugs.”
- Adults telling youth: “Seek help if you are feeling depressed.”
- The “token” youth at the table.
- Inviting youth to an activity.
Cornerstones of Youth-Led Prevention

1. Peer Prevention
2. Service Learning
3. Positive Youth Development
4. Youth Empowerment
5. Youth Organizing

Peer Prevention

• Positive peer pressure
• Knowledge sharing among peers
• Based on real youth experiences
• Encourages youth to develop their own ideas about prevention for implementation
Service Learning

• Serving others for the betterment of self and community is a key ingredient to healthy living.
• Youth learn about compassion and leadership.
• Youth develop self-esteem, communication, organizational skills, and a sense of empowerment.
• Youth learn about citizenship.
• Youth develop a sense of responsibility for their community.
• Youth develop a sense that citizenship requires them to actively participate in their communities.
Positive Youth Development

• Focuses on building the positive attributes young people need in order to be successful.
• Focuses on the strengths of youth instead of their risk factors to ensure that all youth grow up to become contributing adults.
• Provides supports and services necessary to help youth transition through various stages of development.

Youth Empowerment

“Prevention has begun moving away from preventing something negative from happening to a new paradigm, which emphasizes the need to promote positive youth development via youth empowerment.”

(Kim et al., 1998, p. 5)
Empowerment

The process by which individuals gain influence of events and outcomes of importance to them.

(Rappaport, 1984)
Youth Empowerment

• Views youth as a resource rather than a collection of problems
• Focuses on fostering support via developmentally appropriate experiences and resources
• Provides a means for youth to develop a stable, positive identity by providing them an opportunity to participate in a variety of roles that allow them to experiment and better define their identity.

Cahill & Pitts (1997); Chinman & Linney (1998); Rappaport et al. (1984); Zimmerman (1990, 1995, 2000)
Youth Organizing

“Innovative youth development and social justice strategy that trains young people in community organizing and advocacy, and assists them in employing those skills to alter power relations and create meaningful institutional change in their communities.”

(Funder’s Collaborative on Youth Organizing, 2009)
What is the evidence that supports YLP?
Youth-Led in the Literature

Youth-Led in the Literature

Framework for Youth-Led

"Holden et al. Model (2004)"

What is the Ohio Youth-Led Prevention Network? (OYLPN)
The Ohio Youth-Led Prevention Network (OYLPN)

- The project was initiated by:
  - Ohio Department of Mental Health and Addiction Services (Ohio MHAS)
  - Drug Free Action Alliance
  - Includes largest youth-serving organizations of Ohio:
    - Ohio Teen Institute
    - Youth to Youth International
The OYLPN

• The OYLPN was formed to:
  – Build upon and expand partnerships between youth-led prevention programs across the state
  – Develop and strengthen Ohio’s youth-led prevention efforts at both the state- and local-levels
  – OYLPN Adult & Youth Council members consist of youth-led prevention providers and youth from across the state (7 AC and 15 YC members)
OYLPN Guiding Statement

The majority of youth, aged 12-17, in Ohio do not report substance use, physical violence, and mental health issues. The OYLPN is dedicated to protecting and promoting the well-being of Ohio’s youth.
Call to Action

We are the ones! Helping to prevent substance abuse and promote mental, emotional, and behavioral well-being doesn’t take extraordinary efforts – just everyday actions by ordinary people. Those simple actions add up to healthier people, neighborhoods, and communities.
